

Hamмам Bourguiba, Governorate of Jendouba

A popular destination

Current operation situation

- The gushing springs are harnessed by a pool and have been feeding the thermal station since 1975 (Balneotherapy service) and a traditional Hammam.
- In 2000, the new private owner renovated the thermal station.
- The State renovated the traditional Hammam.

Flow improvement prospects

The flow can be improved by:

- Cleaning and stripping the bottom of the source catchment and extending the collection surface area.
- Deepening by few centimetres the well of the existing catchment pool.

Geographical situation

The three springs of Hammam Bourguiba are 15 km west of Ain Drahim, near the border between Tunisia and Algeria.

- Location
 - Map of 1/50000 of Ain Drahim n° 19
 - Longitude (X) 06G 93'60''
 - Latitude (Y) : 40G 85'52''
 - Altitude(Z) : 241m

Classification: Bicarbonated chloride sodic water

Therapeutic indications: Wellness treatment / Toning effect / Regenerating and myo-relaxing effect.
